GLASS OPTIONS

All shower lines

		
Clear	Obscure	Grey
		
Bronze	Rain	AGI Clear
	What is? AGI Clear AGI Clear is our "top-of-the-line" glass product which is virtually crystal clear. AGI Clear is a low-iron, high-clarity glass that is made from silica, with very low amounts of iron. This low level of iron removes the greenish-blue tint that can be seen, especially on larger and thicker sizes of glass.	
Frosted	THE AGI NOTCH	

When a cut out is needed for a pony wall, shelf, or shower seat, we notch our glass instead of your granite / marble using our cutting edge waterjet system.

Commercial Glass

Unparalleled Capabilities. Superior Products. Exceptional Service.

From storefronts to installing a glass wall for your conference room, AGI can do it all. We have perfected the glass fabrication process. Starting with exact measurements and ending with installation, we do it all with expert precision.

You can trust AGI to provide the best glass products in the industry. Floor to ceiling frameless glass doors and fixed panels can turn a chaotic space into a well-defined work area. Gleaming frameless doors can transfix and showcase your office space in a way no other product can.

Brick Glass Railing System

Are you looking for a modern and stylish way to enhance the safety and beauty of your home or office space? Look no further than our glass railing system!

LUXURIOUS *home*

Glass railing systems offer a range of benefits that make them an excellent choice for both residential and commercial buildings. One of the most significant advantages of a glass railing system is the unobstructed view it provides. Unlike traditional railing systems made of wood or metal, glass railings allow for an uninterrupted view of the surrounding environment, whether it is a beautiful landscape or a bustling cityscape. This makes them an ideal choice for balconies, terraces, and other outdoor and indoor spaces.

RAILING SYSTEM GALLERY

— An Unobstructed View —
